Job Motivation and Job Performance: A Case Study of the Maldives' Energy Sector Employees

Abstract

Organizations maintain employee motivation in order to increase output and performance. When there is a lack of employee motivation within a

skills are underutilized and the employees are unable to accomplish organizational goals. The purpose of this study was to determine the level of

electricity company in the Maldives, and to explore the relationship between the job performance and their

used for data collection. The results

favorable relationship between employee motivation and performance.

$p < .001$, these two variables do not appear to be strongly correlated. Further analysis indicates that women had lower motivation than men. This is concerning since women are severely under-represented in the energy sector.

the culture of reciprocity to work of the company, also need to be investigated further.
